PROFILE

Computer Science graduate specializing in **AI/ML Engineering**, with hands-on experience across the full **machine learning workflow** from **data analysis and preprocessing** (NumPy, Pandas, Matplotlib, Seaborn) to building and evaluating models including **regression, classification, and clustering** using **Scikit-Learn**. Currently advancing into **deep learning** (ANN, CNN, RNN) and modern AI application development with **LangChain** and **Retrieval-Augmented Generation (RAG)** pipelines, with deployment experience using **Flask**. Also brings a solid foundation in **full-stack web development** (React, Next.js, Node.js), enabling end-to-end delivery of AI-powered applications from model to production.

EDUCATION

Bachelor's in Computer Science

2022 – 2026 | Sargodha, Pakistan

University Of Sargodha

• **View Academic Transcript**  : <https://tinyurl.com/y32pub4c> 

ICS Physics – Intermediate Level

2021 – 2022 | Sargodha, Pakistan

Aspire College Sargodha

• **View Degree Certificate** :  <https://tinyurl.com/2p8xrn9t> 

Matriculation in Computer Science

2018 – 2020 | Sargodha, Pakistan

Govt High School 79 NB

• **View Degree Certificate** :  <https://tinyurl.com/4ua8act3> 

SKILLS

AI/ML Development

Completed a practical **AI & Machine Learning** course with hands-on experience in **Python, NumPy, Pandas, Scikit-learn, Matplotlib, and Seaborn**. Skilled in **Machine Learning, Deep Learning (CNN, RNN, LSTM), Computer Vision (OpenCV, YOLO), and NLP**. Applied **LangChain** and **RAG**.

Office & Productivity

Tools:

Proficient in **Microsoft Word, Excel, and PowerPoint**, with experience in **data entry, report generation, Excel formulas, pivot tables, and business presentations**.

AI Full Stack Web

Development

Full Stack Web Developer skilled in **HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Node.js, PHP, MySQL, and PostgreSQL**. Experienced in building responsive, scalable web applications and leveraging AI tools to enhance development efficiency.

IT Support &

Operations

Skilled in **hardware, software, and network troubleshooting, IT operations, system configuration, and technical support** to ensure reliable day-to-day operations.

PROFESSIONAL EXPERIENCE

IT Support Specialist

06/2026 | Sargodha, Pakistan

Shalimar Group of Companies

Providing technical support for **hardware, software, LAN/WAN networks, and IT infrastructure**. Responsible for **troubleshooting** system issues, **installing and configuring operating systems and applications**, **maintaining computer systems**, **supporting end-users**, and ensuring the smooth operation of **office IT equipment and network services**.

Data Manager

06/2025 – 10/2025 | Sargodha, Pakistan

SAMWF NGO 83 SB Lahore Road Sargodha

Managed and maintained data collection and monitoring systems using **KoboToolbox**, ensuring data accuracy through effective validation, cleaning, and reporting. Integrated KoboToolbox with **Microsoft Excel** for **real-time data synchronization**, while providing technical support to field teams and maintaining data security and integrity throughout operations.

Search Engine Optimization:

10/2025 – 05/2026 | Sargodha, Pakistan

Rank Divine Toheed Mall Sargodha

Detail-oriented SEO Executive with expertise in **on-page/off-page SEO, keyword optimization**, and analytics. Focused on boosting website traffic and search visibility through data-driven strategies.

PROJECTS

AI & ML

• Deepfake Video Detection Using CNN-LSTM

An AI-based project designed to detect deepfake videos using a hybrid **CNN-LSTM architecture**. The system utilizes **Faster R-CNN** for **face detection** and **feature extraction**, followed by **LSTM** to capture temporal patterns across video frames. This project demonstrates practical experience in computer vision, deep learning, video analysis, and model training for real-world media authenticity detection.

- **Repository Link**: https://github.com/tayyabp0g/Deepfake_Detection

AI-Driven SRS Generator

Built an AI-powered multi-agent platform that transforms business ideas into **IEEE 830-compliant SRS documents** using **LangGraph, FastAPI, OpenRouter, RAG**, and automated document generation workflows.

Repository Link: https://github.com/tayyabp0g/Final_Year_Project

• Flower Classification using Neural Networks

This project is a Digital Image Processing assignment focused on **classifying flowers** using a **4-layer Neural Network** in Python. The dataset consists of **multiple flower categories**, and the model is trained to recognize and **classify images** accurately.

Repository Link: <https://github.com/tayyabp0g/Image-Classification>

WEB DEVELOPMENT

• E-Skool Management Software: <https://shorturl.fm/Q40Ax>

Developed a responsive, stylish, and **animated frontend** with modern **UI/UX principles**, ensuring compatibility interactions.

• Landing Page Project : <https://landing-page-iota-tan-89.vercel.app/>

Created a modern, responsive landing page using **HTML5** and **CSS3**. Features include card-based content, clean **semantic structure**, and adaptive design for desktop and mobile.

• CRUSH-POINT : <https://crush-point.vercel.app/dashboard>

Designed and developed a responsive, stylish, and animated frontend featuring a **dashboard** and **sidebar** navigation. Integrated interactive tables for efficient data management, including **add, edit, and delete** functionality.
